

**Step 1:** If you print this page, measure if the dimensions have been correctly printed

**Step 2:** Prepare the reed switch

1. Use reed switch with glass diameter 1.8 mm and glass length 10 mm
2. Ensure the correct orientation of the reed switch
3. With needle-nose pliers bend the reed's leads 90°, distance 16 mm
4. Cut leads at 10 mm

**Step 3:** Prepare the cable

1. Cable must have at least 2 wires
2. Cable diameter up to 3 mm
3. Cable length: your choice
4. Cut first wire at 10 mm and second wire at 25 mm
5. Insert cable into housing

**Step 4:** Solder reed switch leads and cable wires

**Step 5:** Fix the cable using a zip tie  
(width = 3mm, height = 1mm)

**Step 6:** Press-fit the cover
